

SALDOTECNICA EUROPE
S.R.L. GENOVA

Saldotecnica Europe S.r.l.

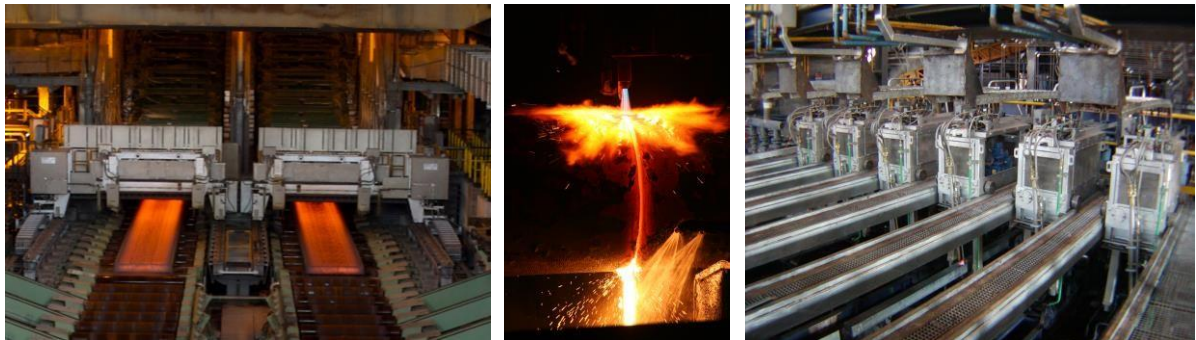

UNI EN ISO 9001:2000
N. I/999/2005 7231D

COMPANY INTRODUCTION

Our production range includes the following categories:

Cutting Machines:

Oxy-cutting machines for CCM - Slabs, blooms, rounds, beam-blanks and billets.

Transversal / longitudinal slab cutting machines for rolling mills.

Transversal / longitudinal plate cutting machines for rolling mills.

Heavy cutting machines up to 2000 mm thickness (ingots or scrap)

Saldotecnica Europe S.r.l.

UNI EN ISO 9001:2000
N. I/999/2005 7231D

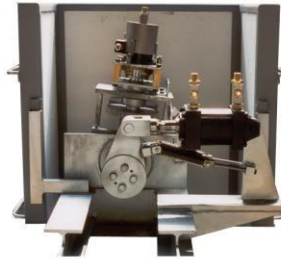

CNC Heavy thickness cutting machines for straight or transversal cutting, shape cutting – forge application

Portable cutting machines (e.g. plates squaring, cutting sections or slitting).

Sample cutting machines

Length measuring systems for CCM

All machines are also available for stainless steel cutting

Deburring machines for continuous casting

Saldotecnica Europe S.r.l.

CNC Cutting Machines:

Shape cutting machines for plates by plasma / flame

Heating stations:

Ladle and tundish heating/drying stations

Ovens for snorkels heating

Saldotecnica Europe S.r.l.

Burners and lances for furnaces:

Burners up to 10 MW including valve stand and automation for EAF

Carbon lances

Oxygen/carbon manipulators for furnaces

Welding machines:

Welding manipulators

Welding stations

Positioners

Welding machines – one-side for shipyards

Scarfig machines:

Hot and cold scarfig machine – full scarfig / spot scarfig

Saldotecnica Europe S.r.l.

Equipment:

Heating, welding and oxy-cutting manual **torches** for different applications (lever or hand wheel operated cutting oxygen depending on specific request)

Machine cutting torches for CCM (Messer®, GeGa®, Alba® or Koike® style)

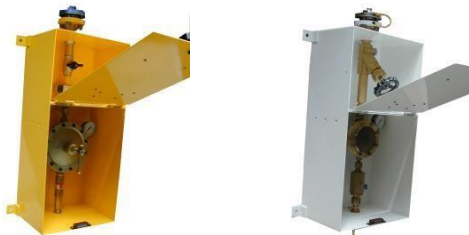

Cutting nozzles for CCM (Messer®, GeGa®, Alba®, Koike® style and a wide range interchangeable to other main producers)

Welding tips for pipe mill.

Pressure regulators for any gas up to 3000 Nm³

Take over points for any gas and any flow rate.

Manual **torches** for heavy cuttings up to 1000 mm thickness

Iron powder injection system for high alloyed or stainless steel cutting.

Scarfig with or without rod feeding device
(Oxweld®, Airco®, Messer®, GeGa® or SAF® style)
and **scarfig nozzles**.

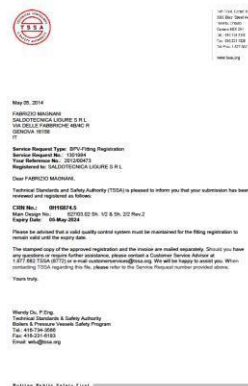

Manual **emergency cutting torches** for continuous casting machine and rolling mills .

® - indicates a registered trade name, that is property of the above named companies

ISO9001:2008 quality certification

TSSA (Canada) approved
